

WE'RE HIRING!

QA Analyst III - Belgrade

Dominion Voting is seeking an experienced **QA Analyst III** to join our team in Belgrade! This position is responsible for ensuring that all products and services comply with all regulations and required functionality and verifying that all products and services either meet or exceed the requirements specified by the customers and guaranteed by the company.

Responsibilities

- Use product backlogs and design documents to write, maintain and execute automated and manual test cases, test scenarios and test scripts.
- Develop and maintain test plans, manual and automated test scripts for user interface, functionality, system, and ad-hoc testing
- Create test processes for new and existing software products
- Define and evaluate test automation strategies
- Execute regression test, functional tests, and data tests
- Lead an automation project from conceptualization to implementation
- Enforce adoption of automation best practices throughout the Scrum agile based, software development life-cycle
- Work with development team to resolve software bugs/defects
- Utilize appropriate tools for defect tracking and issue resolution

Qualifications

- Bachelor's degree in Computer Science (or similar) or equivalent job experience is required.
- A minimum of four (4) years of experience applying test automation practices
- A minimum of two (2) years of experience working in a team using Agile Development methodologies (Scrum)
- Experience with software tools including Jira, Selenium, TestComplete and other test automation and management platforms
- Experience with testing web and mobile (Android or iOS) software applications
- Well-versed in all testing methodologies (white vs. black box test work, system vs. functional)
- A solid understanding of quality assurance as part of the development process
- Detail oriented and problem solver
- Advanced level English language communication skills
- Ability to work in a rapidly changing environment
