Every ballot image is appended with Dominion’s exclusive AuditMark® technology. The system digitally stores an image of every ballot cast along with a clear record of how the tabulator interpreted each vote, ensuring a completely transparent and auditable election.

All results and ballot images are stored on encrypted memory cards. No identifying information about the voter is taken by the tabulator.
The ImageCast® Precinct is the most widely used and reliable optical scan tabulator, with over 100,000 units deployed globally. Over the course of thousands of election projects conducted globally, Dominion has implemented a customer oriented, technical culture focused on achieving the highest levels of accuracy, reliability and transparency.
