**ACCESSIBLE**
All voters use the same device to vote privately and independently.

**FLEXIBLE**
Leverages commercially available hardware, making it cost-effective and versatile.

**SIMPLE**
Intuitive touchscreen interface for easy use by poll workers and voters.

**INTEGRATED**
Driven by Democracy Suite® EMS software, with flexible configurations.

Ideal solution for vote centers, early voting & Election Day.
Largest available touchscreen size in the industry, ranging from 15” to 21”.

Different commercially available hardware options depending on jurisdictional needs.

Compact devices that are cost-effective, easy to store, maintain, and deploy when space is at a premium.

Streamline
In-person Voting

- No guessing ballot quantities or pre-printing ballots.
- Plug and play set up and easy operation.

Universal
Voting Technology

- Optional integrated accessibility components that are fully ADA compliant.
- All voters use the same device to vote privately and independently.

Integration
with Democracy® Suite

- All voting channels and results tabulation take place out of a single, unified database.
- Reduces complexity for election officials.

Modern
Voter Experience

- Variety of on-screen ballot layout options.
- Multi-language support.
- Intuitive ballot navigation using modern touchscreen.

Flexible Hardware Options

Largest available touchscreen size in the industry, ranging from 15” to 21”.

Different commercially available hardware options depending on jurisdictional needs.

Compact devices that are cost-effective, easy to store, maintain, and deploy when space is at a premium.
**CONFIGURATION FLEXIBILITY**

*Ballot Marking Device Configuration*

- Comes with commercially available compact laser printer that prints a summary of the voter’s selections.
- Paper ballots can be scanned on any ImageCast® tabulator in the voting location or central office.

*Direct Record Electronic Configuration*

- Stores individual votes and vote totals directly on the device’s redundant memory.
- Option to include a Voter Verified Paper Audit Trail printer with a permanent paper audit trail.

**Depending on jurisdictional needs, the ImageCast® X can be configured as a ballot marking device (BMD) that prints a paper ballot, or as a direct record electronic (DRE) device that records the individual votes and vote totals directly on the device’s redundant memory.**
The ImageCast® X can be configured as a Ballot Marking Device (BMD), which is paired with a commercially available, compact laser printer that prints a summary of the voters selections. No votes are stored on the ImageCast® X when in the BMD configuration.
**FEATURES & BENEFITS**

**SIMPLE**
Familiar printing technology for both poll workers and voters. Simple process for poll worker to reload paper.

**EFFICIENT**
BMD printer uses standard 8.5” x 11” non-proprietary paper. Unused paper can be saved for later election events.

**FLEXIBLE**
Paper ballots can be scanned on any ImageCast® tabulator in the voting location or central office.

When used in the direct record electronic (DRE) configuration, the ImageCast® X can be paired with a Voter Verified Paper Audit Trail (VVPAT) thermal printer. Every electronic record stored on the ImageCast® X redundant memory has a corresponding paper record copy in the form of the VVPAT receipt.
FEATURES & BENEFITS

SIMPLE
Easy-to-use compact thermal printer that allows voters to review, accept, or reject their paper record.

EFFICIENT
The VVPAT viewing screen automatically turns opaque between voter sessions, saving paper and maintaining privacy.

ACCESSIBLE
The only system on the market that enables audio-playback of the VVPAT record.
